

# KOLONIERNA

News from the periphery.

**The camp in Jamtmyrå-/Vilseforest is happening soon, 16 Februari - 1 Mars is it, but come whenever you want! New testminings are planned in Sápmi, the resistance is charging up and we are starting a podcast project that you can join!**

## REBELLRADIO

**Now we are starting an insurrectionary/anarchistic/anti-parliamentary-politics pod and we want to invite you to join the project!**

We hate this fucking capitalistic society and we want to change it fundamentally. The idea is to let different people that are struggling or are making cool projects be heard in different episodes. How you make an episode is up to the individuals making it. We'd like it to be more like friendly conversations than a debate. It would be really great if you wanted to join!

There are several way to make an episode, if you want to make one yourself that's great, if you want to be interviewed that's also good! :)

The pod can be in other languages than Swedish if the participants feel more comfortable so. We want the episodes to not be dominated by white/norm/hetero/cis/middle class men (because they have all the space everywhere else). The people talking can talk about their struggle, it's a bit strange if cis-peps are talking trans-struggle for example. We want the people that are otherwise invisible to be heard. You don't have to identify with a certain ism to join, but you cannot advocate party politics or economic growth as solutions.

It's also supposed to be an anti hierarchical pod. The conflicts present in society is the norm here, you don't have to explain there is sexism, funkophobia, racism, environmental destruction etc. rather take the discussion further and show the diverse resistance against the existing norms and systems. This pod is by and for us that break with the present norms!

The target group is people interested in struggle outside the parliament.

Also tell us if you know some nice people that can be heard! We hope to inspire a lot of cool resistance through this pod. Don't be afraid to ask things or join the project to also make the decisions. We help you with the technology and everything!

## BOLIDEN CAN TESTMINE

Rocksjöliden is in Örnsköldsviks municipality. The decision was made by Mark- och miljödomstolen (the first instance). The area is in Vilhelmina south sameby's most important winter grace area for the reindeer and the decision means that the colonizer's courts did not listen to the saami.

## LAEVAS SAAMI VILLAGE APPEAL MINING PLANS

– We have changed our minds about this Viscaria mining plan. We have to guard the lands we still got left, says the saami village's Niila Inga. The corp Avalon Minerals has plans for two areas north of Kiruna and if they start one, they could start both.

## FOREST CAMP

You are invited to a forest camp in the last two weeks of February! We will do inventory in different parts of the threatened Vilse skogen, go skiing, discuss different methods of resisting the logging companies, record our own radio, build snow huts, see films and make actions.

For more info: [kamp@kolonierna.se](mailto:kamp@kolonierna.se)

## PGP-Key

It can be a good thing to be secure when government is spying and evil corporations are planning disasters. To send and receive encrypted information use PGP!

We have a PGP-key you can use to send us information encrypted if you want and need to. Check out [kolonierna.se](http://kolonierna.se) under tipsa/contact to find it and learn how to use it.

## SHORT NEWS

- The green party don't give a fuck about Ojnare anymore, as long as they can rule.
- Plundering or development, conference in Ume 21-22 Feb. [www.jordensvanner.se](http://www.jordensvanner.se)
- LKAB's mining plans are criticized and they also run the "risk" of not making profits this year.
